

PUREGEN

PROVEN & PATENTED TEMPERATURE-
CONTROLLED PROFESSIONAL
SKIN TIGHTENING SYSTEM

PureRegen™ is a patented professional low-frequency RF device with a temperature-controlled safety system to tighten skin.

PureRegen™ is a patented professional low-frequency RF device with a temperature-controlled safety system to tighten facial skin. It can also be used to tighten skin on other parts of the body after a session with the PureLight™ device.

PureRegen™ is designed for professional use. The unit is compact, and is safe and easy to operate.

The shape of the electrodes makes it easy to apply just the right pressure to the skin, even in curved areas.

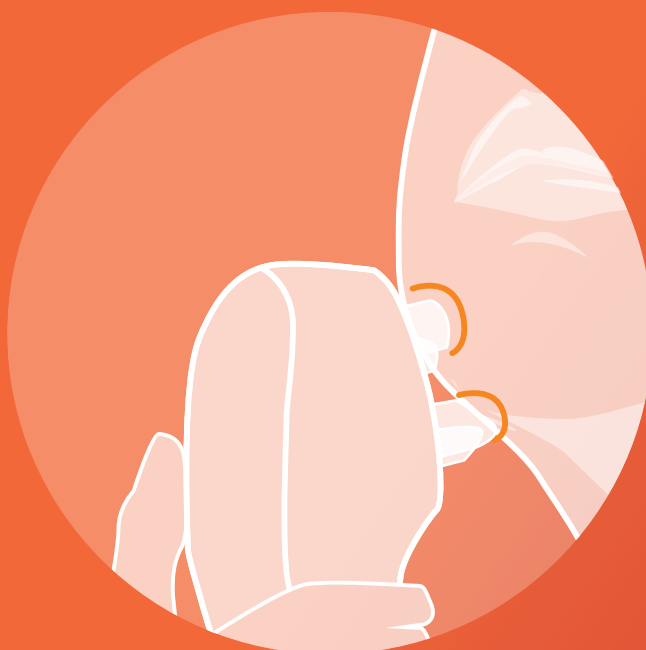

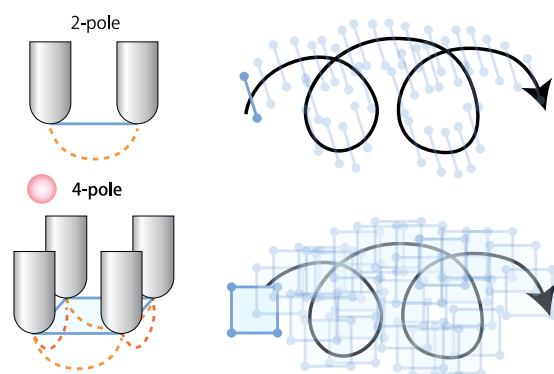

Low resistance between the electrodes and the skin means current can be concentrated where it is needed.

This means the area can be treated effectively without harming the skin.

FOUR POLES TREAT A LARGE AREA MORE EFFICIENTLY.

Benefits

- 1 Allows for release of fat and cellulite from adipose tissue
- 2 Encourages regeneration of collagen to reduce wrinkles and tighten skin
- 3 Reduces the number of visible pores
- 4 Reduces the coloring & effects of skin pigmentation
- 5 Improves moisture and viscoelasticity of skin

PUREGEN

Skin Rejuvenation & Tightening Study

This study was conducted by Inforward, Inc., an independent agency, over a four-week period to measure the efficacy of PureRegen™ in skin rejuvenation and tightening. The subjects' entire face was treated with PureRegen™ in three 10-minute sessions a week for four weeks. Visible pores, facial pigmentation, wrinkles, moisture content, and

viscoelasticity were measured before and after the use of PureRegen™. The results of the study show marked reduction in the number of visible pores, reduction in the pigmentation area, reduction in width and depth of wrinkles, as well as an increase in moisture and viscoelasticity of facial skin.

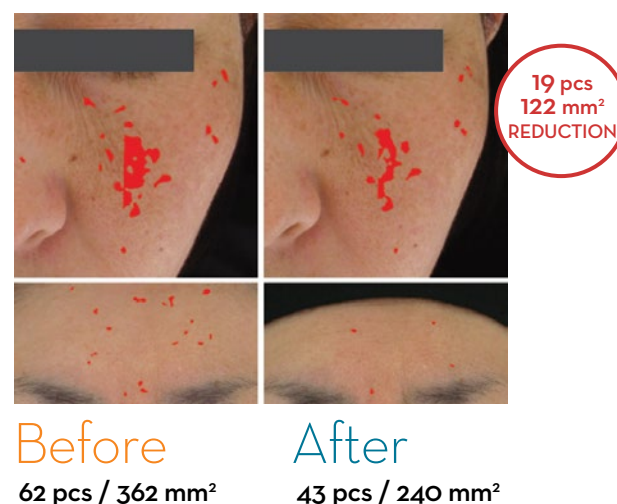

EVALUATION OF VISIBLE PORES

AFTER 4 WEEKS

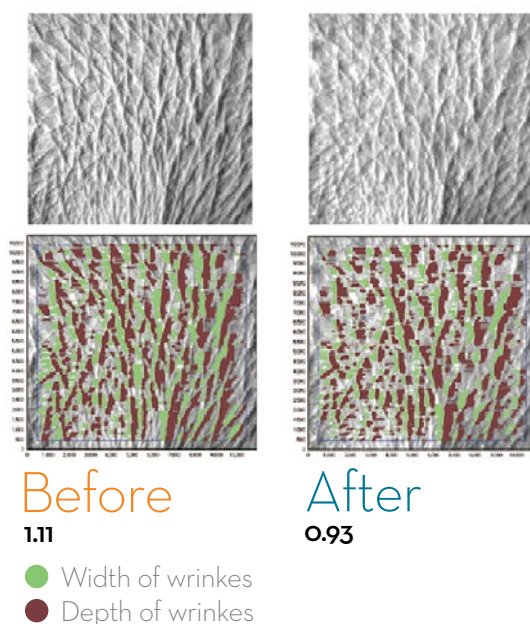

EVALUATION OF PIGMENTATION

AFTER 4 WEEKS

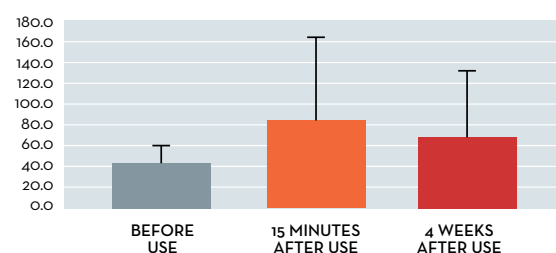

EVALUATION OF THE NUMBER OF WRINKLES

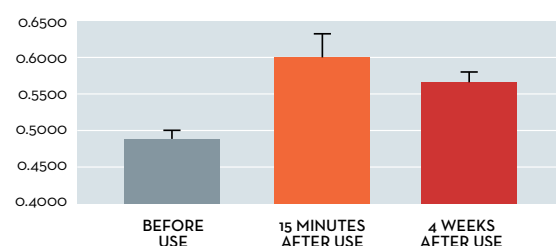

AFTER 15 MINUTES USE

EVALUATION OF THE STRATUM CORNEUM WATER CONTENT

EVALUATION OF SKIN VISCOELASTICITY

SKIN TIGHTENING SYSTEM

SPECIFICATIONS

Rated Voltage and Frequency	AC100V-240V 50/60Hz
Rated Input	40W
Adapter Model	DC15V 3A
Output Frequency	1 MHz
Timer	20 minutes
Safety Device	OVERCURRENT PROTECTION, OVERTEMPERATURE PROTECTION
Body Dimensions	W335mm x D150mm x H65mm
Weight	About 624g
